

## **Global Digital Health Partnership Cyber Security Workstream**

### **Proposed Global Digital Health Model Security Notice (Ver 3)**

**May 2023**

**INTRODUCTION:** The Cyber Security Workstream focuses on strategies that can strengthen the processes and practices designed to protect healthcare related devices, systems, and networks, as well as the data within them, from security risks and cyber-attacks.

The Global Digital Health Model Security Notice (MSN) is being proposed as an openly available resource designed to help developers clearly convey information about their security policies to their users in one easily accessible resource. Like a standard Nutritional Facts Label, the Digital Health MSN provides a snapshot of a company's existing security practices, encouraging transparency and helping targeted consumers make informed choices when selecting products. The Digital Health MSN does not mandate specific policies or substitute for more comprehensive or detailed security policies but allows for documenting a company's standard security practices and applied security models or frameworks.

#### **DEFINITIONS:**

- **Security Notice Criteria:** A set of security measures to be addressed by developers, manufacturers or other Digital Health companies.
- **Implemented Safeguards:** Cyber Security measures that have been applied for specific Digital Health technologies.
- **Digital Health System or Service:** A generic term used for information and communication technology to support health and healthcare. Examples of Digital Health technologies may include mobile telemedicine, health monitoring and surveillance devices, mobile device applications that may be provided on patient monitoring devices, personal digital assistants (PDAs), laptops and more.

**Color Code:** Digital Health developers or manufacturers will provide information on their product's security policies and measures by completing the "Contact Details" and "Implemented Safeguards" sections of the MSN.

**Blue Text:** Form guidance language

**Green Text:** Prompts for additional information

## Global Digital Health Model Security Notice Form

Sub-Sections	Manufacturer/Developer Contact Details
ConDe.1	<ul style="list-style-type: none"> <li>• [Legal Entity Name]</li> <li>• [Digital Health Technology Name]</li> <li>• [Link (URL) to primary website]</li> <li>• [Link to full Security Policy]</li> <li>• [Link to Online Comment/Contact Form]</li> <li>• [Security Contact Name]</li> <li>• [Security Contact Email Address]</li> <li>• [Security Contact Phone Number]</li> <li>• [Address; <i>minimum, Country</i>]</li> </ul>

SECTIONS:	SECURITY NOTICE CRITERIA	DIGITAL HEALTH SYSTEM OR SERVICE IMPLEMENTED SAFEGUARDS
Sub-Section	<p><b>Confidentiality Control:</b>                      This section describes what security controls are in place to keep customer/user data private.</p>	

SECTIONS:	SECURITY NOTICE CRITERIA	DIGITAL HEALTH SYSTEM OR SERVICE IMPLEMENTED SAFEGUARDS
<p>Con.1</p>	<p><b>Authorization Control:</b> <i>the process of approving access a system or data.</i></p> <p>How is access granted to authorized users?</p>	<ul style="list-style-type: none"> <li>• Responses should address: <ul style="list-style-type: none"> <li><input type="checkbox"/> Authorization is granted by user identification and password</li> <li><input type="checkbox"/> Passwords are assigned to customers/users and can be modified as needed</li> <li><input type="checkbox"/> Access to system/data is controlled by customer/user roles and cannot be changed by the customer/user</li> <li><input type="checkbox"/> User Account reviews to identify valid accounts are conducted [Identify review frequency]</li> <li><input type="checkbox"/> [Approved Authority Role] is responsible for account request approvals</li> <li><input type="checkbox"/> Access is granted and controlled using an imbedded third-party (external technology, vendor or service provider) [Identify third-party provider]</li> <li><input type="checkbox"/> The policy or regulatory framework that defines authorization is publicly available here: [provide resource location]</li> </ul> </li> </ul> <p>Additional Authorization controls (optional), for example biometric access and/or passphrases:</p> <p>[Open Text]</p>
<p>Con.2</p>	<p><b>Access Control:</b> <i>the process of granting or restricting connection to a system or data.</i></p>	<ul style="list-style-type: none"> <li>• Responses should address: <ul style="list-style-type: none"> <li><input type="checkbox"/> Unique identifiers [user ID] are used to determine how and when customer/user information is accessed</li> </ul> </li> </ul>

SECTIONS:	SECURITY NOTICE CRITERIA	DIGITAL HEALTH SYSTEM OR SERVICE IMPLEMENTED SAFEGUARDS
	How is access to data controlled and monitored?	<input type="checkbox"/> Unique identifiers are used before access to data is permitted <input type="checkbox"/> Authorization is granted and controlled using a third-party (external vendor or service provider) <input type="checkbox"/> [Identify third-party provider]
Con.3	<p><b>Data Classification:</b> <i>the process of categorizing data by sensitivity level.</i></p> <p>What is the classification of the data being stored, processed and/or transmitted?</p>	<ul style="list-style-type: none"> <li>• <b>Responses should address:</b> Describe the data classification of the data stored, processed and/or transmitted by the Digital Health technology:               <ul style="list-style-type: none"> <li><input type="checkbox"/> <u>Personally Identifiable Information:</u> [List applicable PII elements]</li> <li><input type="checkbox"/> <u>Personal Health Information</u></li> <li><input type="checkbox"/> Electronic health records</li> <li><input type="checkbox"/> Administrative data</li> <li><input type="checkbox"/> Claims data</li> <li><input type="checkbox"/> Patient / Disease registries</li> <li><input type="checkbox"/> Health surveys</li> <li><input type="checkbox"/> Clinical trials data</li> <li><input type="checkbox"/> Claims and PII/PHI data are stored separately</li> </ul> </li> </ul> <p>[If your organization uses third-party systems (external technology, vendor or service provider)]</p> <input type="checkbox"/> [Identify third-party provider]

SECTIONS:	SECURITY NOTICE CRITERIA	DIGITAL HEALTH SYSTEM OR SERVICE IMPLEMENTED SAFEGUARDS
		<input type="checkbox"/> Describe the level of sensitivity of the third-party resource: <a href="#">[Open Text]</a>
<p>Con.4</p>	<p><b>Authentication:</b> <i>the process of determining whether someone or something is who or what it says it is.</i></p> <p>How are users or systems authenticated before being granted access data?</p>	<ul style="list-style-type: none"> <li>• <b>Responses should address:</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> The Zero Trust Architecture Model is used This framework requires all users to be authenticated, authorized, and continuously validated.</li> <li><input type="checkbox"/> Two-Factor (2FA) or Multi-Factor Authentication (MFA) is used. (For example, biometrics, PIN numbers, or tokens) This authentication requires two or more forms of identification for access.</li> <li><input type="checkbox"/> Electronic access tokens are used Access tokens are required for electronic authentication to verify authenticity.</li> <li><input type="checkbox"/> Strong and complex usernames and passwords are used</li> <li><input type="checkbox"/> No default passwords are used</li> </ul> </li> </ul> <p>If your organization uses additional or alternative methods of authentication. List here:  <a href="#">[Open Text]</a></p>
<p><b>Sub-Section</b></p>	<p style="text-align: center;"><b>Integrity Control:</b></p> <p>This section describes what security controls are in place to maintain the consistency and trustworthiness of customer/user data.</p>	

SECTIONS:	SECURITY NOTICE CRITERIA	DIGITAL HEALTH SYSTEM OR SERVICE IMPLEMENTED SAFEGUARDS
Int.1	<p><b>Data Integrity:</b> <i>The process of confirming the overall accuracy, completeness, and consistency of data.</i></p> <p>How is the overall accuracy of data maintained?</p>	<ul style="list-style-type: none"> <li>• Responses should address: <ul style="list-style-type: none"> <li><input type="checkbox"/> Risk-based validation is performed on all information on a regular basis</li> <li><input type="checkbox"/> Back-ups of data are performed on a regular basis [Describe the frequency and duration]</li> <li><input type="checkbox"/> Duplicated data is removed</li> <li><input type="checkbox"/> Data validation techniques are in place and performed regularly, such as: <ul style="list-style-type: none"> <li>▪ Data type validation;</li> <li>▪ Range and constraint validation;</li> <li>▪ Code and cross-reference validation;</li> <li>▪ Structured validation; and</li> <li>▪ Consistency validation.</li> </ul> </li> </ul> </li> </ul>
Int.2	<p><b>System Integrity:</b> <i>The process of guarding against improper system modification or destruction.</i></p> <p>What controls are in place to protect against malicious code or other malware?</p>	<ul style="list-style-type: none"> <li>• Responses should address: <ul style="list-style-type: none"> <li><input type="checkbox"/> Development included security processes This ensures that security is introduced early in the development process from initial design through delivery.</li> <li><input type="checkbox"/> Unknown applications or software are blocked from access</li> <li><input type="checkbox"/> External files or folders are blocked from access (For example, USB drives)</li> </ul> </li> </ul>

SECTIONS:	SECURITY NOTICE CRITERIA	DIGITAL HEALTH SYSTEM OR SERVICE IMPLEMENTED SAFEGUARDS
		Other: If your organization uses a third-party resource (external technology, vendor or service provider) <ul style="list-style-type: none"> <li><input type="checkbox"/> [Identify third-party provider]</li> </ul> [Open Text]
<b>Sub-Section</b>	<b>Availability:</b> This section describes what security controls are in place to ensure customer/user data is available with minimum interruptions.	
Ava.1	<p><b>Availability:</b> <i>The process ensuring timely and reliable access to and use of information.</i></p> <p>What controls are in place to ensure the <b>system and data</b> will be available when needed?</p>	<ul style="list-style-type: none"> <li>• <b>Responses should address:</b></li> </ul> <p>Data availability is maintained using:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Patches are applied and tested on a regular basis</li> <li><input type="checkbox"/> Data formatting and processes have been streamlined to meet customer/user needs</li> <li><input type="checkbox"/> Monitoring is performed to identify corrupted data, which is removed when discovered</li> <li><input type="checkbox"/> System and data recovery times are performed as described in established Service Level Agreements (<i>where applicable</i>)</li> <li><input type="checkbox"/> Data redundancy is prioritized to improve availability</li> <li><input type="checkbox"/> Automated failovers are in place ensuring minimal to no downtime</li> </ul> <p>Data availability is protected from Denial of Service or Distributed Denial of Service attacks using the following security controls:</p>
